

# Printer Highlights

## M&R DFT - 24"- P / NP

**The only Powder and No-Powder combo DFT printer in the world.  
This patented technology encompasses :**

- Industrial-built printer and drying systems.
- Dual powder & no-powder dryer systems.
- Full safety system on both printer & dryer (Sensor/alarms to notify operator).
- On-board microcomputer controlling:
  1. All access doors have safety switches.
  2. Temperature & Humidity real-time monitoring.
  3. Real-time dryer temperature controls.
  4. Real-time ink level control with alarm.
  5. Full safety lighting.
  6. Multiple-level safety warnings.
- Auto tension film roller with autocorrect.
- Printer stand is equipped with a tripoint leveling system.
- Programmable auto-cleaning feature, while the printer is inactive.
- Clear polycarbonate printer doors to monitor printing.
- Patented jet-able liquid adhesive through a print head.
- Powder shaker is a brushless system that eliminates static electricity, which allows the use of the thinnest powder in the market.
- Auto re-circulating touch-free powder disbursement system.
- Fully enclosed drying systems.
- 7 heating zones. 3 on the powder and 4 on the no-powder.
- Our no-powder uses a patented radiant convection heating system which makes the softest hand feel when adhered to polyester.
